GEODynamics®

STRATX™

GEODynamics' STRATX™ delivers a factory-loaded, plug-and-play, limited entry perforating system for unconventional reservoirs.

Designed with HELLFire™ technology, STRATX™ provides more effective multi-stage plug-and-perf operations with minimal tool string length, delivering more clusters per stage in a factory-loaded, plug-and-play, limited entry perforating system for unconventional reservoirs.

FEATURES

- Utilizes STRATX Addressable™/RapidFire™ safe system
- RapidFire™ technology (fastest addressable on the market)
- Zero wired connections between guns and inside tandem sub
- Streamlined factory-assembled perforating
- Carrier size of 3-1/8"

BENEFITS

- Disposable port less sub (cost saving while reducing risk)
- Top fire allows doe safer shipment of loaded perforating carriers
- Factory loaded for reliability
  - Switch and detonator installed (carrier & sub pairs)
- Detonator is shunted
  - Compatible with numerous industry standard electric detonators
- Shorter than competitor designs

HELLFIRE™

Product Name	Part Number	Perforating Condition	Explosive
HELLFire™ 26	EC2-31K0671-26	Fluid	6g, RDX
HELLFire™ 28	EC2-31K0671-28		6g, RDX
HELLFire™ 33	EC2-31K0771-33		7g, RDX
HELLFire™ 36	EC2-31K0771-36		7g, RDX
HELLFire™ 42	EC2-31K0771-42		7g, RDX

API Performance				
Shot Density	API 19B Targeted Pipe	Entrance Hole *(in)[cm]*	EHD Variation	Rock Penetration API 19B-Sec. 2 *(in)[cm]*
1 to 6 shots per cluster	4.5" OD, P110	0.26 [0.66]	7.4 %	3.2 [8.13]
		0.28 [0.71]	5.5 %	3.2 [8.13]
		0.33 [0.84]	2.9 %	3.2 [8.13]
		0.36 [0.91]	1.6 %	3.2 [8.13]
		0.42 [1.07]	3.8 %	3.2 [8.13]

IMPORTANT: HELLFire 31K charges are NOT interchangeable with 33K charges. EC2-33K series are for 3-3/8" HELLFire only.
