

MODEL "B"

MECHANICAL SETTING TOOL

The Legacy™ Oil Tools Model B Mechanical Setting Tool is designed to run and set the Legacy™ LCR-MS Sleeve Valve Cement Retainer and LBP-MS. It is easy to operate and has low maintenance.

This tool incorporates both a stinger seal and built-in snap latch allowing the tool to be latched into the retainer with set-down weight and released with up-strain and/or right hand rotation. This tool can be run time after time by simply moving the drive housing into the running position. Disassembly is not required every time.

Available for 4 1/2" to 13 3/8" Casing
