

GEODYNAMICS AND CARTRIDGE ACTUATED DEVICES, INC. SIGN DISTRIBUTION AGREEMENT

GEODynamics is the Exclusive Global Distributor for CAD Oilfield Products

MILLSAP, TX (August 28, 2024) – GEODynamics®, a global technology and manufacturing leader in perforating, downhole completion, intervention, and wireline conveyed solutions, announced today the company is the exclusive global distributor for Cartridge Actuated Devices, Inc. (CAD) oilfield products.

Founded in 1963, CAD offers over 50 years of experience in the field of custom pyrotechnic development. They design and manufacture energetic CAD/PAD devices including explosive squibs, pressure cartridges, valves, cable cutters, actuators, pin pullers, thrusters, explosive bolts, puncture devices, pneumatic actuation systems, underwater devices, and oilfield products.

As a result of the agreement, GEODynamics will distribute CAD's High Temp Percussion Igniter, Delay Fuse Variable Time, Initiator Hi-Temp (320F) with 020 O-Ring Groove, Initiator Hi-Temp (425F) with 020 O-Ring Groove, Detonator Slim Line, and Energy Transfer Device. These products perform seamlessly with GEODynamics' family of firing heads, and the technology pairings are field-proven to deliver reliable results for wireline service providers.

“This strategic alliance supports our historical success with incorporating CAD solutions into our GEODynamics technologies and allows us to more efficiently meet market demand,” said Ronald Hickerson, Group VP Downhole Technologies, Oil States. “Our field service relationships uniquely position us to provide wireline operators exactly what they need to successfully complete their downhole projects.”

“We are delighted to partner with GEODynamics for the distribution of our oilfield products,” said John Borduin, President, CAD. “Being able to offer our customers a high-quality product, in-stock, allows them to run their business more efficiently and that is a win for all of us.”

About GEODynamics

GEODynamics is an industry leading researcher, developer, and manufacturer of engineered solutions to connect the wellbore with the formation in oil and gas well completions. Our solution-oriented product lines span the life of a well from advance perforating systems, innovative lines of well completion tools, to the wells' end-of-life abandonment tools. GEODynamics is a subsidiary of Oil States International, Inc.
